

## Token Distribution

dForce Token's total supply is 1 billion, the contract has already been deployed on Ethereum Network: 0x431ad2ff6a9c365805ebad47ee021148d6f7dbe0

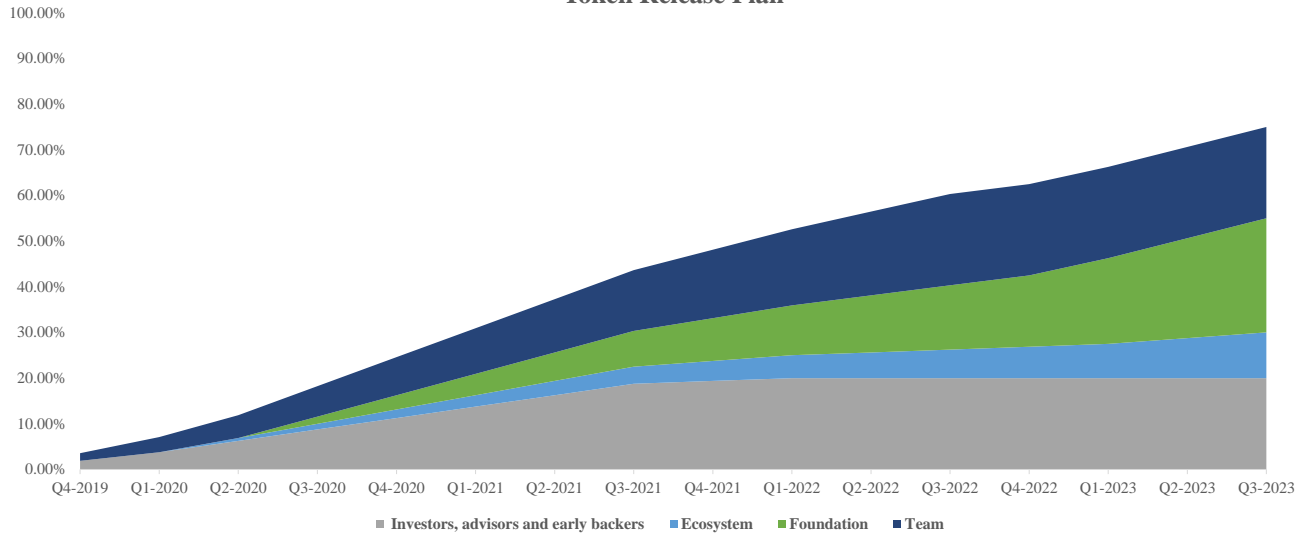

Total DF Token Supply: 1,000,000,000 (1 billion)

### DF Token Distribution and Vesting

- 20% for investors, advisors and early backers, vested over two years
- 20% for the founding team and its employees via option pool, subject to 3-year vesting (starting from Q4 2019).
- 25% for Gravity Pool. Gravity Pool is for a variety of incentive initiatives, including liquidity mining, staking rewards and other community participation rewards. We will evaluate on a case-by-case basis, i.e the amount of each initiative, timing, tenor and the vesting structure. We encourage long-term, non-speculative participation and intend to incorporate in a variety of factors for the distribution. In the event that the DF tokens in the Gravity Pool are exhausted, it will be funded with vested tokens from Ecosystem and Foundation pools.
- 10% for Ecosystem, vested over three years starting from Q2-2020, this is for supporting ecosystem protocol, bootstrapping ecosystem projects, incentivizing integrated partner, funding ecosystem projects, can be used for fund raising purposes and alternative to fund Gravity Pool once it exhausted. The 'Better Future' airdrop is funded by the Ecosystem pool.
- 25% for the Foundation, vested over three years, starting from Q3-2020, for general purpose support of the dForce, including but not limited to fund raising for development, ecosystem support and long-term incentives and alternative to fund Gravity Pool once it exhausted.

## Token Release Plan
